# 7 reasons for prescription swimming goggles

Welcome to the world of relaxed swimming! For people with poor eyesight, prescription swimming goggles are an essential companion for clear vision and unlimited water fun. Immerse yourself in a new feeling of freedom and safety in the water. Prescription swimming goggles are a must for water sports and swimming enthusiasts to improve your vision underwater and protect your eyes.

## 1. Adaptability

Swimming goggles are available in different sizes, shapes and designs. Our models Squid and Shark can also be custom glazed with your exact prescription to suit your needs.

## 2. Clear vision

Wearing swimming goggles enables clear and distortion-free vision under water and thus better orientation and a safer swimming experience. Our assembly kits Turtle and Shell come with an anti-fog coating on the insides of the lenses. Turtle's SWIPE technology reactivates the anti-fog coating at the swipe of a finger.

## 3. Eye protection

Swimming goggles protect your eyes from chlorine and other irritating substances in the water that can cause irritation and infection.

## 4. UV protection

High-quality swimming goggles offer UV protection that protects your eyes from the harmful effects of the sun's rays when swimming outdoors or in the open sea.

## 5. Reduction of glare

Tinted swimming goggles reduce glare that can be caused by sunlight on the water surface, thereby improving your vision and your performance in the water.

## 6. Preservation of contact lenses

Prescription swimming goggles make wearing contact lenses unnecessary, protecting against drying out and loss of the contact lenses and reduce the risk of infection from invading bacteria.

## 7. Improving your performance

Swimming goggles allow you to fully concentrate on your swimming technique and performance without being affected by irritated eyes or blurred vision.

## How do swimming goggles fit correctly?

To find out whether swimming goggles fit well, they must be tried on before use.

The most important areas to pay attention to are **the eye sockets and the area around the nose.**

The ideal fit can easily be tested by gently pressing the swimming goggles against your eyes without putting on the headband.

Goggles with **an ideal fit will stay in the eye sockets for a few seconds- - even without putting on the headband. You will feel a pleasant, even pressure around the eye area.**

For an individual fit in the nose area, the swimming goggles should have adjustable or replaceable nose bridges.

# Our recommendation:

**Assembly kit**  
SWIPE technology,  
Lenses from +6.00 dpt.  
Up to -10.00 dpt.

**Turtle**

**Assembly kit**  
hypoallergenic,  
Lenses from +6.00 dpt.  
Up to -7.00 dpt.

**Shell**

**Glazable**  
Lenses from +6.00 dpt.  
Up to -11.00 dpt. with cyl.  
+/- 3.00 dpt.

**Squid**

**Glazable**  
Lenses from +6.00 dpt.  
Up to -11.00 dpt. with cyl.  
+/- 3.00 dpt.

**Shark**

These, and many other swimming goggles models, such as Ocean RX, are also available in other colours. Ask your optician.

**Also available:  
swimming goggles for  
children with and without  
prescription**
